

# UPDATES IN CAR T-CELL THERAPY

A Winship Cancer Institute of Emory University webinar

**Thursday, May 20, 12:00 p.m.**

Immunotherapy is advancing cancer treatment.

One treatment in particular, chimeric antigen receptor T-cell (CAR T) therapy, is improving lives for patients with lymphoma. In this live webinar, Winship hematologist Jean Koff, MD, MS, will review updates in the use of CAR T-cell therapy as a promising treatment strategy for patients with certain types of lymphoma.

## **Jean Koff, MD, MS**

Assistant Professor, Department of Hematology  
and Medical Oncology  
Emory University School of Medicine

Dr. Koff is a clinical investigator in the Bone Marrow  
and Stem Cell Transplant Center at Winship Cancer  
Institute of Emory University, and specializes in the  
treatment of patients with lymphoid malignancies.

Webinar is intended for referring physicians, community oncologists and healthcare professionals.
