General Information

COURSE DESCRIPTION

The American Thyroid Association thyroid cancer guidelines have recently undergone three sets of changes. Two examples of these changes include active surveillance for thyroid cancer and the use of molecular diagnostics for indeterminate thyroid nodules. There are also major advances in the use of multi-kinase inhibitors for thyroid cancer, and in the non-surgical management of thyroid nodules/cancer.

Utilizing engaging lectures and interactive panels, this in-person symposium is designed to improve the care of patients with thyroid cancer by providing up to date didactics on the workup, management and surveillance of suspicious thyroid nodules and thyroid cancers.

TARGET AUDIENCE

This activity is intended for medical, radiation and surgical oncologists, endocrinologists, otolaryngologists, and all healthcare professionals who care for patients with thyroid cancer or suspected thyroid cancer.

REGISTRATION FEES

Physician: \$150.00
Nurse/Advanced Practice Providers: \$75.00
Medical Students/Fellows/Residents: \$25.00

Refunds less a \$25 administrative fee will be made if written cancellation is received no later than September 1, 2023. **After September 1, no refunds will be given.**
