# General Information

## COURSE DESCRIPTION

This hybrid symposium will have expert review of the latest procedures, technology, and medical treatments for GI cancer patients. National guidelines will be reviewed. Emphasis will be on multi-disciplinary care, novel new drugs that have been recently FDA-approved, and upcoming clinical trials. This symposium is for physicians, nurse practitioners, physician assistants, pharmacists, and oncology nurses who care for cancer patients.

## TARGET AUDIENCE

This activity is intended for Physicians, Nurse Practitioners, Oncology Nurses, Physician Assistants, and Pharmacists. Trainees, at all levels, are highly encouraged to attend.

**Specialties:** Family Medicine, Internal Medicine, Pathology, Oncology, Radiology, Surgery, and Radiation Oncology/Interventional Radiology

## LEARNING OBJECTIVES

Upon completion of this education activity, learners should be able to:

- Recognize the different treatment modalities available for their patients with GI cancers and formulate a tailored treatment plan.
- Recognize the multi-disciplinary approach (interventional radiology, surgery, radiation oncology, and medical oncology) to treating GI cancers.
- Identify and use the new oncologic drugs for GI cancers and know the ongoing clinical trials.
- Incorporate multi-disciplinary approach towards their patient care and offer an increased number of treatment options for the patients.
