We also have the Friday night cocktail hour, breakfast Saturday morning, and two Saturday snack times that can be sponsored. You would receive the corresponding vendor level and may display company advertisements during the sponsorship times. Contact Monique Jones at 404-778-5303 if you are interested in funding one of these events during the symposium.

The 15th Annual Oncology Nursing Symposium provides an intimate learning environment where the varied facets of oncology nursing will be explored. Nationally recognized speakers will review clinical experiences and provide updates on current research in nursing practice. The symposium will update healthcare professionals on the emerging trends in oncology nursing clinical practice and research and will provide participants with practical

strategies and hands-on tools to improve their nursing practice. Our theme this year is **Challenge Accepted: 15 Years of Overcoming Obstacles in Oncology Nursing through Education, Innovation, and Dedication.**

We anticipate attendance of 350+ oncology nurses, Advanced Practice Registered Nurses, and other health care professionals involved with the care of oncology and hematology patients from the southeast, including metro Atlanta community practices, academic centers and nursing schools.

This live activity will be approved for up to 12 contact hours through Emory Nursing Professional Development Center (ENPDC). It is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation. The sessions will be recorded and available for viewing after the symposium only for Saturday attendees. A link will be sent and partial credit is available.

Upon completion of this educational activity, participants will have updates in the following topics:

1. Symptom Management – Wound Care in Oncology Nursing
2. Diversity, Equity & Inclusion
3. Oncology Nursing Practice/Professional Development - Learning and Teaching in Oncology Nursing
4. Care of the Radiation Oncology Patient – Updates in Radiation Oncology
